Resource Concern and Project Purpose Description

Background: This wetland complex is located on private land owned by Thomas and Kimberly Egan within Wykeham Township, 1.2 miles south of Grace Lake, 1.5 miles West of Eagle Creek, and within close proximity to intermittent streams. The Long Prairie One Watershed, One Plan (LPR1W1P), focuses the location as “tier 1” regarding prioritization of work areas based on plan goals. Within the LPR1W1P, the Todd SWCD/partners are responsible for actions such as Storage Practices (i.e. wetland restoration, floodplain restoration, and cover crops) as a primary goal through the entire implementation timeline. Through the 10yr duration, the output is estimated to be 555 acre-feet with an estimation of \$32,918 annual cost.

Proposal: This project will restore approximately 7.5 acres of drained seasonal wetland habitat located on private land in Todd County, Minnesota. The project will provide wetland habitat for “Federal Trust” resources and native fauna. The project will contribute towards the restoration goals in the Upper Mississippi River/Great Lakes Joint Venture and Minnesota’s Comprehensive Wildlife Conservation Strategy Action Plan. Additionally, this project will provide improved water quality, floodwater retention, groundwater recharge, carbon sequestration, and other biological services important to the public and USFWS’s mission in the Partners for Fish and Wildlife priority landscape, “The Mississippi Headwaters.”

Objectives:

- Install two ditch plugs to updated standards;
- Conduct sediment scrapes where directed; and
- Manage the habitat following installation.

Key Features of Plan:

- In Fish Trap Creek Area and adjacent to Minnesota State Forest Land.
- Because of the threat of erosion, extreme care must be taken to do summer logging on your property. After a hard rain, the soil should dry out and firm up before logging is resumed. Your steep hilly woods can only be logged in the summer
- Featured wildlife includes bald eagles, gray wolves, sharp-tailed grouse, Sandhill cranes, upland sandpipers, common terns, yellow rails, red-necked grebes, trumpeter swans, common loons, least darters, and eastern hognose snakes. This is one of the most important areas of the state for red-shouldered hawks.

Conservation concerns

- Issues of concern include retaining and restoring red-white pine forest type, lowland conifers forest type, and Jack pine woodland. These three habitats have been reduced by one-fourth to one-half of their original acreage in the past 120 years.
- Add native grasses wildflowers to this opening for improved wildlife habitat. Wildflowers benefit pollinators and other insects, which are food for baby birds.
- The harvests recommended in this plan, will greatly improve the wildlife value of your woods, and will begin the process of getting oak regeneration in your woods. You can keep your woods as oak (and aspen) for centuries with the correct management (harvests). Oak acorns are a valuable wildlife food, whereas a maple-basswood woods has very little food for wildlife.

A pair of swans are using the beaver pond for their home. Ducks and geese were also present on the pond.

Your northwest wetland has active beaver colony(s). There are both advantages and disadvantages to beaver, but they are very much a part of the native wildlife, particularly in the wooded part of Minnesota.

Red-shouldered hawks (rare species) Retaining large amounts of mature deciduous forest and limiting the amount of non-forest are both important in promoting nesting and occupancy by red-shouldered hawks in central Minnesota. Land managers hoping to promote occupancy by red-shouldered hawks should avoid creating large clear-cut areas and instead use management practices that preserve the characteristics of forested landscapes (e.g., thinning and light-selection cuts). Clearcuts will cause red-tailed hawks to dominate over the red-shouldered hawks.

Resource Concern and Project Purpose Description

The Sunderman property lies within a wetland complex with direct connectivity to Big Sauk Lake. The Sundermans have worked with Todd SWCD in the past to exclude animals from the wetland complexes when pasturing. Currently the SW corner of the south lot lies within 30 feet of a seasonally flooded basin. The two northern lots drain north to pasture serving as a compliant filter. This year the Sundermans have noted with the extreme weather that their lot is discharging. They have worked with WCTSA to develop a low cost fix plan which MINNFARMS out to compliance. They will construct a heavy use pad of about 2,000 sq. feet to get the cattle off the lower ground and for easier cleaning/manure handling. The lots will be reshaped; an earthen diversion berm will be constructed to divert runoff to a 5'x50' filter area. A second berm will be constructed to prevent excess runoff from reaching the wetland. The lots will reach compliance after the fix. The farm is registered for 52 animal units with the majority of the cow-calf pairs remaining in pasture. This is the type of project perfect for Performance funds- s small farm requiring not a ton of engineering to get improved results. This is in a priority area of the Sauk River One Watershed, One Plan.

Resource Concern and Project Purpose Description

Uncontrolled cattle access to a stream on property has resulted in large amounts of sediment flowing downstream and plugging a culvert under County Road 79 in Moran Township. The issue with the plugged culvert was brought to the SWCD's attention by Todd County Public Works, who is tasked with cleaning out the culvert when plugged. The combination of the fence exclusion and livestock crossing will result in less erosion occurring within the stream and its banks. As a result, less sediment will flow downstream into the Long Prairie River. The project will also reduce the amount of E. coli bacteria entering the stream by limiting cattle access to the stream and nearby wetlands.

RESOLUTION TO ADOPT AND IMPLEMENT THE SAUK RIVER Watershed Collaborative Conservation Reserve Program (CRP) Incentives Program Workplan FY2025

WHEREAS, Todd Soil and Water Conservation District (SWCD) adopted the Sauk River Comprehensive Watershed Management Plan (CWMP) for the area of the county identified within the Sauk River Watershed.

WHEREAS, the Sauk River CWMP called for the development and adoption of biennial work plans, to be completed by a Policy Committee established via the execution of a joint powers collaborative agreement amongst partnering entities implementing the Sauk River CWMP.

WHEREAS, Todd SWCD entered into a joint powers collaborative agreement with partnering entities to implement the Sauk River CWMP, and under this agreement a Policy Committee was established to, amongst other duties, review and recommend approval biennial work plans to collaborative partner's governing boards.

WHEREAS, Todd SWCD has received notice from said Policy Committee that: 1) CRP Incentives Program Workplan has been reviewed and 2) the Policy Committee recommends approval of the same by each collaborative member's governing board.

NOW, THEREFORE, BE IT RESOLVED, Todd SWCD hereby adopts and will begin implementation of the Sauk River Watershed Collaborative CRP Incentives Pilot Program Workplan.

Adopted by the Todd SWCD Board of Supervisors this 12th day of September, 2024.

NOFO 3 – Reforestation for Climate Mitigation and Forest Resilience Proposal

FY 24 US FS IRA – DNR Forestry Proposal

We are letters of collaboration from project partners for the US FS IRA grant.

Guidance from the US Forest Service NOFO

A letter of collaboration is required from each partner described in the proposal. Strong letters of collaboration should:

- Describe the partner's role in proposal development;
- Share the partner's reason for participating, including the ways in which the proposed activities align to their organizational goals;
- Describe the partner's specific role in the cost share program, including resource contributions; and
- Clarify whether the partnership is new or existing, as well as the expected term of the partnership.

A template letter is provided on the next page. Please submit your letter of collaboration to Gary Michael at MN DNR Forestry – gary.michael@state.mn.us

Thank you!

Re: Letter of Collaboration – Minnesota Department of Natural Resources
FY 2024 USDA Forest Service IRA Funding – Notice of Funding Opportunity (NOFO) 3

To Whom it may Concern,

The Todd Soil and Water Conservation District (SWCD) is pleased to be a partner with the Minnesota Department of Natural Resources (MN DNR) on this proposal for the *Notice of Funding Opportunity: Landowner Cost Share Payment Programs for Climate Mitigation and/or Forest Resilience Practices*. This collaborative process is built on the SWCD's history of tree seedling sales and forestry cost share projects with MN DNR. Through these efforts, we have developed long-term working relationships with the MN DNR's Private Forest Management (PFM) Program and local consultants.

We are participating on this project because it directly aligns with relevant forestry policies in the Long Prairie, Mississippi River- Brainerd Area, Red Eye- Wing River, and Crow Wing Comprehensive Watershed Management Plans. The Minnesota State Legislature directed its Board of Water and Soil Resources (BWSR) in partnership with local partners to prepare comprehensive watershed management plans for all major watersheds in the state. Our organization has developed plans for the watersheds in our county, and we are now working together to implement them with the state's Clean Water Legacy funding. The forest conservation work that we do through this federally funded project will complement and leverage our local plan implementation efforts.

To successfully implement this project with MN DNR, we will promote and support landowner outreach and education efforts on the benefits of tree planting and climate smart forestry practices. We will help coordinate the delivery of technical assistance to private landowners with MN DNR Forestry staff and other project partners. We will also support project accomplishment reporting including individual site verifications to ensure project completions. If this proposal is selected for funding, we will provide an in-kind partner contribution equal to of \$5000 over 5 years to this project for climate mitigation and forest resilience cost share practices that support carbon sequestration and help us protect water resources.

This IRA funding will support and expand our partnership with MN DNR to 2030 and lay the further foundations for cooperative forestry efforts beyond. This funding will greatly enhance our collective abilities to implement climate mitigation and forest resilience cost share practices at landscape scales. We urge you to fund this critical project. Thank you.

Sincerely,

Lee Buchholz

TODD COUNTY SOIL AND WATER BOARD OF SUPERVISORS

A RESOLUTION ESTABLISHING MANAGEMENT TEAM SIGNATURE AUTHORIZATION

WHEREAS, the District Boards may delegate the signing of contracts, grant agreements, and supporting program documents to selected District Staff

WHEREAS, the Todd Soil and Water Conservation District (SWCD) Board of Supervisors has vested interest, accountability, and guidance authority in the overall fiscal operations and capacities of the SWCD

WHEREAS, responsible grant management is best served by segregation of duties to the greatest extent possible

WHEREAS, operating under the guidance of the SWCD Board of Supervisors is the “Management Team” composed of the District Manager, the Division Director, and the Program Coordinator in whom the Board places full confidence

WHEREAS, Todd SWCD Board of Supervisors only meets once monthly to review, approve, and sign contracts and grant agreements

WHEREAS, the optimal timing of approvals can positively impact the execution and implementation of programming, grants, and cost-share contracts

BE IT RESOLVED, Todd SWCD District Board of Supervisors delegates authorization to sign grant agreements, payments vouchers, program documentation, and cost-share contracts, normally signed by the Board to those holding the position of Todd SWCD District Manager and/or Todd SWCD Division Director under the following conditions:

1. The execution and implementation of a project, program or grant will be delayed with negative impacts to partners, landowners or the overall operation and success of the SWCD mission by waiting until the next board meeting.
2. **And**, at least two members of the management team are available to review and consent to the decision to sign
3. In the event that the contract, grant agreement, or program document involves funds in excess of \$50,000, the Board Chair will be contacted for pre-consent to sign and the signed document will be brought forward at the next scheduled meeting as discussion or information including the names of the two Management team members who consented the decision to sign.

BE IT FURTHER RESOLVED, in the unusual circumstance of position vacancy in *both* the District Manager and the Division Director, this authority to sign, with prior Board Chair consent, is delegated to the Program Coordinator.
